LIST OF CONTENTS

Number 1

K.G. Zografos, K.N. Androutsopoulos and **G.M. Vasilakis** — 1 — A real-time decision support system for roadway network incident response logistics

M. Bielli, M. Caramia and **P. Carotenuto** — 19 — Genetic algorithms in bus network optimization

M.E.T. Horn — 35 — Fleet scheduling and dispatching for demand-responsive passenger services

A. Kotsialos, M. Papageorgiou, M. Mangeas and **H. Haj-salem** — 65 — Coordinated and integrated control of motorway networks via non-linear optimal control

Number 2

H. Yin, S.C. Wong, J. Xu and **C.K. Wong** — 85 — Urban traffic flow prediction using a fuzzy-neural approach

T.-H. Chang and **Z.-Y. Li** — 99 — Optimization of mainline traffic via an adaptive co-ordinated ramp-metering control model with dynamic OD estimation

X. Jin, R.L. Cheu and **D. Srinivasan** — 121 — Development and adaptation of constructive probabilistic neural network in freeway incident detection

K. Chatterjee, N.B. Hounsell, P.E. Firmin and **P.W. Bonsall** — 149 — Driver response to variable message sign information in London

Number 3

W.Y. Ochieng and **K. Sauer** — 171 — Urban road transport navigation: performance of the global positioning system after selective availability

K.F. Petty, M. Ostland, J. Kwon, J. Rice and **P.J. Bickel** — 189 — A new methodology for evaluating incident detection algorithms

T.F. Golob and **A.C. Regan** — 205 — Trucking industry adoption of information technology: a multivariate discrete choice model

M. Hasan, M. Jha and **M. Ben-Akiva** — 229 — Evaluation of ramp control algorithms using microscopic traffic simulation

Number 4

B.R. Hellinga and **L. Fu**	257	Reducing bias in probe-based arterial link travel time estimates
P.Y. Li and **A. Shrivastava**	275	Traffic flow stability induced by constant time headway policy for adaptive cruise control vehicles
B.L. Smith, B.M. Williams and **R.K. Oswald**	303	Comparison of parametric and nonparametric models for traffic flow forecasting

Numbers 5-6

R. Schleiffer	325	Intelligent agents in traffic and transportation
H. Dia	331	An agent-based approach to modelling driver route choice behaviour under the influence of real-time information
P. Hidas	351	Modelling lane changing and merging in microscopic traffic simulation
R.J.F. Rossetti, R.H. Bordini, A.L.C. Bazzan, S. Bampi, R. Liu and **D. Van Vliet**	373	Using BDI agents to improve driver modelling in a commuter scenario
J. Wahle, A.L.C. Bazzan, F. Klügl and **M. Schreckenberg**	399	The impact of real-time information in a two-route scenario using agent-based simulation
H. Chen and **M. Bell**	419	Instrumented city database analysts using multi-agents
J.L. Adler and **V.J. Blue**	433	A cooperative multi-agent transportation management and route guidance system
R. van Katwijk and **P. van Koningsbruggen**	455	Coordination of traffic management instruments using agent technology
J.Z. Hernández, S. Ossowski and **A. García-Serrano**	473	Multiagent architectures for intelligent traffic management systems
F. Logi and **S.G. Ritchie**	507	A multi-agent architecture for cooperative inter-jurisdictional traffic congestion management
